Summary of the main economic developments and monetary policy in December 2025

Real economy

Industrial output

Source: NIS, EC-DG ECFIN

Labour force

Source: NIS, NBR calculations

In December 2025, industrial output increased by 1.5 percent in annual terms, the 4.3 percentage point faster pace versus the prior month being mainly ascribed to a calendar effect. In manufacturing, the annual dynamics of output volume returned to positive territory (1.2 percent), the evolution being supported by sub-sectors such as electrical equipment, electronic products and food industry. In the last case, production went up by 3.8 percent month on month, following the contractions recorded in the previous months, on account of lower demand. The manufacture of non-metallic mineral products also witnessed a recovery, with production growing by 14.7 percent from the month before¹, in correlation with the step-up in activity in construction. However, the output volume narrowed further in annual terms in important sub-sectors, i.e. crude oil processing, chemical products, metallurgy. The short-term outlook is not indicative of a rebound in manufacturing, given that the DG ECFIN confidence indicator remained negative in January 2026, at a level similar to the 2025 Q4 average (-2.1 points), while the Manufacturing PMI stayed below the growth threshold of 50 points (48.1 points in January 2026).

The slowdown in economic activity reflected to a certain extent in the evolution of labour demand. Although the job vacancy rate remained unchanged at 0.6 percent in 2025 Q4, the number of employees continued to decrease in annual terms, going down by 0.5 percent in December and as an average for the quarter as a whole. In December 2025, the ILO unemployment rate was 6 percent, a value around which it fluctuated throughout the year. However, the pessimistic prospects

¹ After four months of decline, which cumulatively had a similar magnitude.

of companies are further mirrored by their answers to the DG ECFIN survey, the employment expectations indicator signalling that personnel adjustments may continue in the short run. The annual growth rate of the gross wage economy-wide halted its downward trend, climbing to 6.7 percent (+0.5 percentage points) in December. This was solely due to the private sector wage dynamics (step-up to 9 percent), marked by a certain volatility, *inter alia* coming from the staff cuts made in some economic sub-sectors, through the composition effects generated by layoffs of lower-income earners and the manner of recording the compensations linked to voluntary separations. In the budgetary sector, wages posted a larger contraction (-1.8 percent).

In the last month of 2025, retail trade (except for motor vehicles and motorcycles) decreased by 1.6 percent in annual terms, reflecting the further weakening of consumer demand, amid the decline in households' purchasing power in the second half of the year. The contraction in the volume of sales was relatively broad-based (-3.5 percent and -2.3 percent in the food and non-food segments respectively); only motor fuel purchases posted a rise (+4.3 percent year on year). Trade activity is little likely to see a revival in the immediately following period, as suggested by the confidence indicator among retailers (-2.1 points, January 2026) and consumers (-34.6 points, below the average of -30.5 points recorded in the last three months of 2025).

Exports of goods saw a rebound in December, their annual change reaching 9.4 percent, as a result of external sales to both EU and non-EU countries. The breakdown shows that approximately half of the aggregate indicator growth was due to "machinery and transport equipment", a contribution being made by exports of motor vehicles, spurred by the launch of new models in the course of 2025. Significant increases were also posted by exports of "food and live animals", "crude materials, inedible, except fuels" and "vegetal and animal oils, fats and waxes", the trend of which was further influenced by the bountiful crops of straw cereals and oleaginous plants. Imports of

Industrial producer prices on the domestic market

annual percentage change

Source: NIS, Eurostat

goods fell by 0.4 percent in annual terms, the decline in purchases of agri-food products and fuels being partly offset by the rise in imports of machinery, equipment and transport means. As a result, trade deficit narrowed further, i.e. by 18.7 percent versus December 2024, to EUR 2,705 million.

The annual growth rate of industrial producer prices on the domestic market stepped up to 6.5 percent in December 2025 (+1.7 percentage points from November), the trend being visible for most groups of goods. In the case of energy, the annual increase in prices accelerated by 3 percentage points, primarily on account of a statistical effect in electricity, heating and gas production and supply, the monthly change being negative (-0.4 percent). Producer prices of intermediate and capital goods also posted rising annual dynamics, on the back of the hike in metal prices. Additional upward pressure came, in the case of capital goods prices, from the bottlenecks in the supply of microchips, with effects on the manufacture of motor parts. Conversely, producer prices for consumer goods showed relative stability (annual advance of 6.0 percent), given the broadly favourable conditions in agri-food commodity markets.

Annual inflation rate

contributions; percentage points

*) the effect of electricity and natural gas market liberalisation was taken into account for 2021-2022

Source: NIS, NBR calculations

The annual CPI inflation rate decreased marginally in December 2025 to 9.69 percent (-0.07 percentage points versus November). In the case of exogenous components, the only significant change in dynamics was recorded by motor fuel prices, due to the decline in Brent oil price in the international markets, amid excess supply. The annual adjusted CORE2 inflation rate acted in the opposite direction, as it continued on an upward path, climbing to 8.5 percent (+0.2 percentage points as against November). The advance stemmed mainly from changes in prices of processed food and non-food items. In the former case, the annual change in prices was further marked by the still high unit labour costs in food industry, as well as by the surge in prices of some products (particularly cocoa and coffee). In the case of non-food prices, external factors made the largest contribution, via the import channel.

Policy rates

Exchange rate calculated and published by the NBR

December 2025

Monetary policy

In December 2025, monetary policy was implemented in line with the NBR Board decisions in the meeting of 12 November 2025, namely to keep the monetary policy rate at 6.50 percent and to leave unchanged the lending facility rate at 7.50 percent and the deposit facility rate at 5.50 percent. Furthermore, minimum reserve requirement ratios on both leu- and foreign currency-denominated liabilities of credit institutions were kept at 8 percent and 5 percent respectively.

On the interbank money market, the daily average interest rate diminished its fluctuations even more, consolidating at levels slightly above the lower bound of the interest rate corridor², amid the widening of the liquidity surplus, which the central bank mopped up via the deposit facility³. Moreover, longer-term (3M-12M) ROBOR rates decreased further, albeit somewhat more slowly, staying above the April 2025 readings⁴.

The EUR/RON exchange rate stuck to an upward path in December, amid slightly stronger fluctuations⁵, reflecting the successive revisions of investor expectations on the future path of the Fed's policy rate, with effects on global risk appetite as well, but also in the context of the steps taken domestically related to the adoption in full of the second package of corrective fiscal measures and of other budget consolidation measures.

Credit institutions' average interest rates applicable to non-bank clients posted mixed changes in

² In December overall, the average (weighted by the volume of transactions) of interbank deposit rates witnessed a new marginal decline, reaching 5.57 percent, i.e. -0.03 percentage points against the previous month.

³ During the reported month overall, the average daily stock of these deposits rose to lei 29.5 billion from lei 22.5 billion in November.

⁴ The monthly averages of ROBOR rates shed 0.09-0.10 percentage points versus the prior month, to stand at 6.19 percent for the 3-month maturity and at 6.33 percent and 6.53 percent for the 6- and 12-month rates respectively.

⁵ In December overall, the leu weakened 0.1 percent against the euro. During the same period, the forint and the Czech koruna depreciated 0.2 percent and 0.1 percent respectively versus the single currency, while the zloty strengthened 0.3 percent.

Credit institutions' interest rates on loans and deposits

percent per annum

December 2025. Specifically, the average lending rate on new business to households went down further, to 7.49 percent (-0.13 percentage points from November), under the joint influence of the marginal decrease in the average interest rate on new housing loans and of their larger weight in the total credit flow, which was partly counterbalanced by the significant increase in the average interest rate on new consumer credit. In turn, the average lending rate on new business to non-financial corporations saw a new decline (-0.21 percentage points, to 8.55 percent), reflecting the reduction in the interest rate on new low-value loans (below EUR 1 million equivalent), but also the marked widening of the share of new high-value loans (above the said threshold), whose interest rate – relatively smaller – rose in the closing month of 2025. The average remuneration of new time deposits remained unchanged for households (at 5.40 percent), but continued to go down slowly for non-financial corporations (-0.05 percentage points, to 5.54 percent).

*) the accrued interest payable related to financial liabilities is also included.

Note: According to ESA 2010, the IMF's SDR allocations are included in foreign liabilities.

The outstanding loans and deposits at the end of the reported month do not include the accrued interest receivable/payable.

The outstanding loans at the end of the reported month include non-performing loans.

1) As of June 2014, indicators are determined based on the information submitted by banks according to Commission Implementing Regulation (EU) No 680/2014 laying down implementing technical standards with regard to supervisory reporting of institutions according to Regulation (EU) No 575/2013 of the European Parliament and of the Council. Once Implementing Regulation (EU) No 680/2014 entered into force, the leverage ratio was included in the reporting statements in compliance with the said technical standards and is reported accordingly by credit institutions. Starting in June 2021, Regulation (EU) No 680/2014 was replaced by Regulation (EU) 2021/451.

2) Indicators cover solely credit institutions which are Romanian legal entities.

3) According to NBR Order No. 27/2010, NBR Order No. 9/2017 and NBR Order No. 10/2017, as subsequently amended and supplemented.

4) According to NBR Order No. 9/2017 approving the Methodological Norms on the FINREP reporting framework at solo level, in compliance with the International Financial Reporting Standards, applicable to credit institutions for prudential purposes, non-performing exposures are those listed under Article 47a paragraph 3 of CRR.

5) Pursuant to Commission Delegated Regulation (EU) 2015/61 to supplement Regulation (EU) No 575/2013; the indicator shall be equal to the ratio of a credit institution's liquidity buffer to its net liquidity outflows over a 30 calendar day stress period and shall be expressed as a percentage.

*) Indicators are calculated based on data in prudential reports, prior to submission of audited annual accounts.

11.2. Credit risk information*

Period	Total due amounts - overall risk (lei mn.)	Total overdue amounts (lei mn.) *) refers to the exposure to a single debtor, which may be equal to or higher than lei 20,000. The specific indicators are calculated based on the reports of reporting institutions such as credit institutions, Romanian legal entities, and development banks, Romanian legal entities; the Romanian branches of foreign credit institutions; non-bank financial institutions (NBFI), Romanian legal entities, and the Romanian branches of foreign non-bank financial institutions, listed in the Special Register; electronic money institutions (EMI), Romanian legal entities, and the Romanian branches of foreign electronic money institutions, entered in the registers and lists managed by the NBR, which provide credit relating to payment services; payment institutions (PI), Romanian legal entities, and the Romanian branches of foreign payment institutions, entered in the registers and lists managed by the NBR, which provide credit relating to payment services.

Note: NBR Regulation No. 4/2025 on the organisation and functioning of the Central Credit Register operated by the National Bank of Romania became effective on 1 December 2025, recast in Monitorul Oficial al Romaniei, Part I, No. 913 of 3 October 2025.

*) It refers to the exposure to a single debtor, which is equal to or higher than lei 20,000. The granted amount is the loan granted or the commitment undertaken according to the contract. The granted amount is not updated in the current month for the loans or commitments in foreign exchange reported in previous months.

Note: NBR Regulation No. 4/2025 on the organisation and functioning of the Central Credit Register operated by the National Bank of Romania became effective on 1 December 2025, recast in Monitorul Oficial al Romaniei, Part I, No. 913 of 3 October 2025.

*) It refers to the exposure to a single debtor, which is equal to or higher than lei 20,000. The granted amount is the loan granted according to the contract. The granted amount is not updated in the current month for the loans or commitments in foreign exchange reported in previous months.

Note: NBR Regulation No. 4/2025 on the organisation and functioning of the Central Credit Register operated by the National Bank of Romania became effective on 1 December 2025, recast in Monitorul Oficial al Romaniei, Part I, No. 913 of 3 October 2025.

Methodological notes

1. Main macroeconomic indicators

Data series on the main economic and social indicators are taken from the publications of the National Institute of Statistics (*Monthly Statistical Bulletin, Industry Statistical Bulletin, Prices Statistical Bulletin, Statistical Yearbook*) or its Tempo-Online database; some of these data are preliminary and may be revised subsequently.

Data series are updated on a regular basis once they are published by the NIS.

Starting January 2018, the amount of the average gross wage earnings economy-wide reflects the transfer to employees of those parts of social security and health contributions that were previously paid by employers. As a result, the annual changes in the average gross wage earnings economy-wide reported for 2018 are not comparable with the data series recorded prior to this moment.

Annual data for economy-wide number of employees and average earnings are taken from the *Earnings and labour cost* bulletin, published by the NIS.

CORE1 is the core inflation measure that reflects changes in market prices; CORE1 is calculated based on the overall CPI excluding administered prices.

CORE2 is the core inflation measure that reflects changes in market prices with relatively low volatility; CORE2 is calculated based on the headline CPI excluding administered prices and highly volatile prices (vegetables, fruit, eggs, fuels).

The adjusted CORE2 is the core inflation measure that excludes from the headline CPI a number of prices on which monetary policy (via aggregate demand management) has limited or no influence: administered prices, volatile prices (vegetables, fruit, eggs and fuels), prices of tobacco products and alcoholic beverages, as well as prices of electricity and natural gas (the latter are no longer administered in 2021-2022).

The annual data on core inflation measures are based on NBR calculations.

The harmonised index of consumer prices (HICP) is obtained based on the Eurostat methodology (2015 = 100).

3. Monetary policy indicators

3.1. Open market operations performed by the National Bank of Romania

Open market operations performed by the NBR and standing facilities granted by the central bank to eligible participants are laid down in NBR Regulation No. 1/2000 republished, as subsequently amended and supplemented.

The volume of open market operations performed by the NBR is shown as daily averages for both transactions performed in the reported period (flows) and their balance (stocks). The average interest rate in the reporting month is calculated as an arithmetic mean (weighted by the volume of transactions) of interest rates on flow/stock operations.

3.2. Standing facilities granted by the National Bank of Romania to eligible counterparties

The NBR's standing facilities (lending and deposit facilities) are resorted to by eligible counterparties at their initiative.

The interest rate on the marginal lending facility is the rate at which eligible counterparties are granted overnight liquidity. The interest rate on the marginal deposit facility is the rate at which eligible counterparties may place excess liquidity with the NBR at the end of the day (overnight).

3.3. Minimum reserve requirements

Minimum reserves requirements (MRR) are leu- and foreign currency-denominated holdings of credit institutions kept in accounts opened with the National Bank of Romania.

The calculation base for the MRR is the daily average (for the observation period) of the outstanding leu- and foreign currency-denominated liabilities in banks' balance sheets (except for interbank liabilities, financial obligations to the NBR and equity capital). The observation period and the maintenance period come in succession and last one month each; the observation period starts on the 24th of the previous month and ends on the 23rd of the current month. Minimum reserve requirement ratios may vary by currency and residual maturity of the items included in the calculation base (below or over 2 years). MRR are provisioned as daily average of holdings in the NBR accounts during the maintenance period.

3.4. Leu-denominated government securities purchased by the NBR on the secondary market

4. Reserve money

Data for preparing monetary indicators are reported in accordance with the provisions of Regulation (EU) 2021/379 of the European Central Bank of 22 January 2021 on the balance sheet items of credit institutions and of the monetary financial institutions sector (recast) (ECB/2021/2), implemented by the National Bank of Romania into Chapter II of Title I of NBR Regulation No. 4/2021 on reporting statistical data and information to the National Bank of Romania.

Until December 2021, data on monetary indicators were reported in accordance with the provisions of Regulation (EU) No 1071/2013 of the European Central Bank of 24 September 2013 concerning the balance sheet of the monetary financial institutions sector (recast) (ECB/2013/33), implemented by the National Bank of Romania into Chapter II of Title I of NBR Regulation No. 4/2014, as subsequently amended and supplemented.

5. Monetary balance sheets of monetary financial institutions

According to ESA 2010 methodology (the European System of National and Regional Accounts), monetary financial institutions include the following institutional sectors: (i) central bank (S121) – the National Bank of Romania; (ii) deposit-taking corporations except the central bank (S122), which comprise MFI credit institutions and deposit-taking corporations other than credit institutions, the latter category including: (a) other financial institutions, which are principally engaged in financial intermediation and whose business is to receive deposits and/or close substitutes for deposits from institutional units, hence not only from monetary financial institutions, and to grant loans and/or to make investments in debt securities and (b) electronic money institutions, which are principally engaged in financial intermediation in the form of electronic money issuance; (iii) money market funds (MMFs) (S123) – collective investment undertakings that have been authorised pursuant to Article 4 of Regulation (EU) 2017/1131 of the European

Parliament and of the Council of 14 June 2017 on money market funds and that issue shares or units which are close substitutes for deposits as referred to in Part 1 of Annex I to Regulation (EU) 2021/379 of the European Central Bank of 22 January 2021 on the balance sheet items of credit institutions and of the monetary financial institutions sector (recast) (ECB/2021/2).

In the monetary balance sheets of monetary financial institutions, the accrued interest receivable/payable related to financial assets and liabilities is recorded under remaining assets/remaining liabilities.

5.2. Aggregate monetary balance sheet of other monetary financial institutions

The aggregate monetary balance sheet of other monetary financial institutions includes on-balance sheet assets and liabilities of MFI credit institutions (having the meaning referred to in Article 4(1) point 1(a) of Regulation (EU) No 575/2013 of the European Parliament and of the Council on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No 648/2012, as subsequently amended and supplemented), money market funds, as well as electronic money institutions.

5.3. Net consolidated balance sheet of monetary financial institutions (NBR and other monetary financial institutions)

The net consolidated balance sheet of monetary financial institutions shows the aggregation of the National Bank of Romania's monetary balance sheet with that of other monetary financial institutions (credit institutions, money market funds and electronic money institutions), in which the relations within and between these institutional sectors were considered on a net basis.

6. Broad money M3 and its counterparts

Monetary aggregates have been defined in compliance with the methodology of the European Central Bank.

Narrow money (M1) comprises currency in circulation (banknotes and coins) plus overnight deposits (deposits immediately convertible into cash or used for making payments via bank transfer).

Intermediate money (M2) comprises M1 plus deposits with an agreed maturity of up to two years and deposits redeemable at notice of up to three months.

Broad money (M3) comprises M2 plus marketable instruments issued by monetary financial institutions, money market instruments, in particular money market fund shares/units and borrowings from repurchase agreements (their highly liquid nature makes of these instruments close substitutes for deposits).

Broad money M3 counterparts are net foreign assets and net domestic assets.

Net foreign assets are calculated by subtracting foreign liabilities from foreign assets. Foreign assets include: loans to non-residents; deposits placed with non-residents; holdings of debt securities issued by non-residents; shares and other equity issued by non-residents; monetary gold. Foreign liabilities include funds taken from non-residents: deposits, debt securities issued on external markets. Starting with December 2014, SDR allocations from the IMF are included under foreign liabilities, in line with the new international statistical standards (ESA 2010).

Net domestic assets are calculated by subtracting domestic liabilities (except for M3 components) from domestic assets.

Domestic assets include: loans to residents; holdings of debt securities issued by residents; shares and other equity issued by residents. Domestic liabilities (except for M3 components) include funds taken from residents: deposits with an agreed maturity of over two years (including deposits redeemable at notice of over three months), tradable debt securities with a maturity of over two years issued on the domestic market, capital and reserves.

7. Breakdown of monetary financial institutions' deposits and loans by institutional sector

The breakdown of financial instrument holders and issuers by institutional sector is based on the ESA 2010 methodology and is shown in detail in Chapter I of Title I of NBR Regulation No. 4/2021 on reporting statistical data and information to the National Bank of Romania.

These are: non-financial corporations, financial corporations (central bank, deposit-taking corporations except the central bank, money market funds (MMFs), non-MMF investment funds, other financial intermediaries, financial auxiliaries, captive financial institutions and money lenders, insurance corporations and pension funds), general government, households, non-profit institutions serving households, non-residents.

Non-government credit (i.e. loans to the private sector) are the loans granted by credit institutions to households and legal entities (non-financial corporations and non-monetary financial institutions).

Government credit includes the loans granted to the general government (central government, local government, administration of social security funds), as well as the debt securities issued by these institutional sectors. The outstanding loans and deposits at the end of the reported month do not include the accrued interest receivable/payable. The outstanding loans at the end of the reported month include non-performing loans.

Indicators related to households also include non-profit institutions serving households.

7.1. Deposits of non-government resident clients

Current accounts, demand deposits and all time deposits, regardless of maturity, are included.

The outstanding deposits at the end of the reported month do not include the accrued interest payable.

8. Assets and liabilities of non-MMF investment funds

Investment funds are defined in Article 1 of Regulation (EU) No 1073/2013 of the European Central Bank of 18 October 2013 concerning statistics on the assets and liabilities of investment funds (recast) (ECB/2013/38), implemented by the NBR into Chapter V of Title I of NBR Regulation No. 4/2021 on reporting statistical data and information to the National Bank of Romania, as collective investment undertakings that invest in financial and/or non-financial assets to the extent that their objective is investing capital raised from the public.

Pension funds and money market funds (MMFs) are not included.

Until December 2014, data on the assets and liabilities of non-MMF investment funds were reported in accordance with the provisions of Regulation (EC) No. 958/2007 of the European Central Bank of 27 July 2007 concerning statistics on the assets and liabilities of investment funds (ECB/2007/8), implemented by the NBR into Chapter V of Title I of NBR Regulation No. 31/2011 as amended and supplemented by NBR Regulation No. 3/2013.

Data on the assets and liabilities of non-MMF investment funds are published in terms of aggregate monthly stocks. Monthly changes in stocks may be the result of financial transactions, revaluations due to price and exchange rate movements or reclassifications and other statistical adjustments.

In the statistics of assets and liabilities of non-MMF investment funds, the accrued interest receivable/payable on loans and deposits is recorded under remaining assets/remaining liabilities.

The value of debt securities held includes the related claim. Indicators related to households also include non-profit institutions serving households.

The types of instruments representing assets and liabilities of non-MMF investment funds, as well as the classification of their counterpart by institutional sector, are fully harmonised with the methodology under the European System of National and Regional Accounts (ESA 2010).

9. Assets and liabilities of non-bank financial institutions in the General Register

Starting with 31 March 2008 until 31 December 2014, data on non-bank financial institutions (or financial corporations engaged in lending) are reported in accordance with the methodology under Guideline 2009/23 of the European Central Bank amending Guideline ECB/2007/9 on monetary, financial institutions and markets statistics. This methodology was implemented into Chapter IV "Statistics regarding on-balance sheet assets and liabilities of non-bank financial institutions" of Title I of NBR Regulation No. 31/2011 on reporting statistical data and information to the National Bank of Romania, as amended and supplemented by NBR Regulation No. 3/2013.

Starting with the reference date of 31 March 2015, data on non-bank financial institutions have been reported in accordance with the methodology under Guideline 2014/15 of the European Central Bank on monetary and financial statistics (recast), as subsequently amended and supplemented. This methodology was implemented into Chapter IV "Statistical reporting of on-balance sheet assets and liabilities of non-bank financial institutions" of Title I of NBR Regulation No. 4/2014 on reporting statistical data and information to the National Bank of Romania, as subsequently amended and supplemented.

Starting with the reference date of 31 March 2022, data on non-bank financial institutions are reported in accordance with the methodology under Guideline 2021/12 of the European Central Bank on statistical information to be reported on financial intermediaries other than monetary financial institutions, as subsequently amended and supplemented. This methodology was implemented into Chapter IV "Statistics regarding on-balance sheet assets and liabilities of non-bank financial institutions" of Title I of NBR Regulation No. 4/2021 on reporting statistical data and information to the National Bank of Romania. The on-balance sheet assets and liabilities are broken down by financial instrument and institutional sector, in accordance with the methodology provided under the European System of National and Regional Accounts (ESA 2010).

The breakdown of assets and liabilities by type of non-bank financial institutions is in line with the lending activities regulated by Law No. 93/2009 on non-bank financial institutions and with the General Register entries.

Based on the data submitted by non-bank financial institutions and in keeping with the analysis requirements, loans are classified by institutional sector (households, non-financial corporations, other sectors and non-residents), type of financing (consumer, housing and other loan types), original maturity (up to 1 year, over 1 year and up to 5 years, and over 5 years) and currency (lei, EUR and other).

In the statistics of on-balance sheet assets and liabilities of non-bank financial institutions, the accrued interest receivable/payable on loans and deposits is recorded under remaining assets/remaining liabilities.

10. Interest rates applied by credit institutions

Starting with January 2022, interest rates on outstanding loans/deposits and lending and deposit rates on new business are calculated in line with the methodology laid down in Regulation (EU) No 1072/2013 of the European Central Bank of 24 September 2013 concerning statistics on interest rates applied by monetary financial institutions (recast) (ECB/2013/34). This methodology was implemented by the National Bank of Romania into Chapter III of Title I of NBR Regulation No. 4/2021 on reporting statistical data and information to the National Bank of Romania, which took over the provisions of NBR Regulation No. 4/2014 on reporting statistical data and information to the National Bank of Romania, as subsequently amended and supplemented, that had been in force in the period from December 2014 to December 2021 and was repealed.

Until December 2014, interest rates on outstanding loans/deposits and lending and deposit rates on new business were calculated in line with the provisions of Regulation (EC) No. 63/2002 of the European Central Bank of 20 December 2001 concerning statistics on interest rates applied by monetary financial institutions to deposits and loans vis-à-vis households and non-financial corporations (ECB/2001/18), as amended by Regulation (EC) No. 290/2009 of the European Central Bank of 31 March 2009 (ECB/2009/7). This methodology was implemented by the National Bank of Romania into Chapter III of Title I of NBR Regulation No. 31/2011 on reporting statistical data and information to the National Bank of Romania, as amended and supplemented by NBR Regulation No. 3/2013.

Interest rates are calculated as a weighted mean of the annualised interest rate and the outstanding amounts of loans/deposits at the end of the month or the volume of new loans/deposits during the reported month.

The calculation base of interest rates on outstanding loans at the end of the reported month does not include non-performing loans and loans for debt restructuring granted at below market rates. The calculation base of lending rates on new business does not include overdrafts, revolving credit, claims related to credit cards, non-performing loans and loans for debt restructuring granted at below market rates.

The outstanding loans and deposits at the end of the reported month as well as the volume of new loan/deposit contracts in the reported month do not include the accrued interest receivable/payable.

The annualised rate is the interest rate agreed between the credit institution and the customer for a deposit or loan, converted to an annual basis and quoted in percentages per annum.

Pursuant to the Regulation, interest rates are calculated for the following institutional sectors: non-financial corporations, households and non-profit institutions serving households (indicators related to households also include non-profit institutions serving households), as well as for the following balance sheet items: loans (total), overdrafts, revolving credit, claims related to (extended and opportunity) credit cards, housing loans, consumer credit, other lending (including also business development loans granted to freelancers and family associations), overnight deposits, deposits redeemable at notice, time deposits and repo agreements.

11. Credit risk indicators

11.1. Key prudential indicators

As of 1 January 2014, NBR Order No. 13/2011 regarding reporting minimum capital requirements for credit institutions was implicitly repealed, once the new CRD IV [Directive 2013/36/EU and Regulation (EU) No 575/2013] regulatory framework came into force. As of June 2014, indicators are determined based on the information submitted by banks according to Commission Implementing

Regulation (EU) No 680/2014 laying down implementing technical standards with regard to supervisory reporting of institutions according to Regulation (EU) No 575/2013 of the European Parliament and of the Council. Starting 28 June 2021, it was replaced by Commission Implementing Regulation (EU) 2021/451 of 17 December 2020 laying down implementing technical standards for the application of Regulation (EU) No 575/2013 of the European Parliament and of the Council with regard to supervisory reporting of institutions and repealing Implementing Regulation (EU) No 680/2014.

For this purpose, pursuant to Article 92(2) of Regulation (EU) No 575/2013, institutions shall calculate their capital ratios as follows: (a) the Common Equity Tier 1 capital ratio is the Common Equity Tier 1 capital of the institution expressed as a percentage of the total risk exposure amount; (b) the Tier 1 capital ratio is the Tier 1 capital of the institution expressed as a percentage of the total risk exposure amount; (c) the total capital ratio (previously known as the solvency ratio) is the own funds of the institution expressed as a percentage of the total risk exposure amount.

The leverage ratio measures to what extent credit institutions' own funds cover the funding of their business and it is calculated based on the methodology laid down in Regulation (EU) No 575/2013, as an institution's capital measure (Tier 1 capital) divided by that institution's total exposure measure (the sum of the exposure values of all assets and off-balance sheet items not deducted when determining the capital measure). Once Commission Implementing Regulation (EU) No 680/2014 entered into force, the leverage ratio was included in the reporting statements in compliance with the said technical standards and is reported accordingly by credit institutions.

Starting with January 2012, in view of the harmonisation of the chart of accounts and the financial and prudential reporting system with the new rules required by the switch to the IFRS, certain loan portfolio quality indicators determined based on financial statements (whose numerator represented "past-due and doubtful claims") could no longer be calculated and were therefore replaced by the following indicators: (i) impaired assets of non-bank clients (net value)/total non-bank loan portfolio (net value); (ii) impaired assets of non-bank clients (net value)/total assets (net value) and (iii) impaired assets of non-bank clients (net value)/total liabilities.

The non-performing loan ratio is the key loan portfolio quality indicator.

According to the EBA regulations on reporting non-performing exposures and Regulation (EU) 2021/451, implemented at national level via NBR Order No. 9/2017 approving the Methodological Norms on the FINREP reporting framework at solo level, in compliance with the International Financial Reporting Standards, applicable to credit institutions for prudential purposes, non-performing exposures are those listed under Article 47a paragraph 3 of CRR, as follows:

- (a) an exposure in respect of which a default is considered to have occurred in accordance with Article 178;
- (b) an exposure which is considered to be impaired in accordance with the applicable accounting framework;
- (c) an exposure under probation pursuant to paragraph 7, where additional forbearance measures are granted or where the exposure becomes more than 30 days past due;
- (d) an exposure in the form of a commitment that, were it drawn down or otherwise used, would likely not be paid back in full without realisation of collateral;
- (e) an exposure in form of a financial guarantee that is likely to be called by the guaranteed party, including where the underlying guaranteed exposure meets the criteria to be considered as non-performing.

According to NBR Order No. 9/2017, the “non-performing loan ratio as defined by the EBA” is calculated as the ratio of gross non-performing loans and advances (Form F18.00, lines 005, 070, 191 and 221, column 60) to total gross loans and advances (gross carrying amount) (Form F18.00, lines 005, 070, 191 and 221, column 10).

As for liquidity, according to the provisions of the European regulatory framework, credit institutions shall calculate and report to the National Bank of Romania the liquidity coverage ratio (LCR). Specifically, pursuant to Art. 4 of Commission Delegated Regulation (EU) 2015/61 to supplement Regulation (EU) No 575/2013 of the European Parliament and the Council with regard to liquidity coverage requirement for credit institutions, the above-mentioned indicator shall be equal to the ratio of a credit institution’s liquidity buffer to its net liquidity outflows over a 30 calendar day stress period and shall be expressed as a percentage. Credit institutions shall maintain a liquidity coverage ratio of at least 100 percent. The frequency, format and instructions of reporting on liquidity coverage requirement were set by Implementing Regulation (EU) No 680/2014 laying down implementing technical standards with regard to supervisory reporting of institutions according to Regulation (EU) No 575/2013, replaced by Regulation (EU) 2021/451.

11.2. Credit risk information

11.3. Loans granted and commitments assumed by credit institutions

11.4. Loans granted by credit institutions

11.5. Debts overdue for more than 30 days incurred by individuals

Past-due debts for more than 30 days in the repayment of loans by individuals are reported by the Credit Bureau, based on the data supplied by credit institutions and non-bank financial institutions participating in the Credit Bureau System. In these reports, the overdue amount recorded with the Credit Bureau represents the value of the past-due debt (principal, interest and penalty rate) in relation to the concerned loan, denominated in the loan currency. The Credit Bureau is a joint-stock company, member of the Association of Consumer Credit Information Suppliers (ACCIS).

11.6. Loans granted and commitments assumed by NBFIs + EMI + PI

11.7. Loans granted by NBFIs + EMI + PI

The credit risk information encompasses identification data on a borrower – individual or non-bank legal entity – and the following leu- and foreign currency-denominated operations whereby reporting institutions face risk exposure to the respective borrower via: (a) loans granted and (b) commitments assumed by the reporting institution on behalf of the debtor.

The credit risk information refers to the exposure of each reporting institution to a single borrower, which may be equal to or higher than lei 20,000.

The borrower’s ownership type is consistent with MPF Order in force approving the Financial Reporting System for economic agents (Types of Ownership Nomenclature); the type of loan granted to individuals and non-bank legal entities (by risk) observes the accounting rules compliant with the International Financial Reporting Standards applicable to credit institutions and with the accounting rules compliant with EU Directives; the loan currency respects the globally applicable regulations; activity of borrower is consistent with Order No. 377/2024, issued by the President of the National Institute of Statistics, on the updating of NACE. The classification meets the analysis requirements of the National Bank of Romania.

Tables 11.2., 11.3., 11.4., 11.6. and 11.7. show credit risk information reported to the Central Credit Register. Data series for the past 84 months are updated on a monthly basis.

11.8. Rejected debit payment instruments

11.9. Account holders that generated payment incidents

Tables 11.8. and 11.9. provide information on the rejected debit payment instruments registered in the Payment Incidents Register database, as well as on the accountholders that generated payment incidents related to cheques, bills of exchange and promissory notes.

As regards the number of account holders, the monthly values represent the number of account holders reported to the Payment Incidents Register (PIR) in the respective month. The arithmetic sum of account holders calculated for several months is not the same with the number of account holders reported once to the PIR over that period, as the same account holder can be reported with payment incidents in different months.

12. Money market indicators

12.1. Interbank operations

According to NBR Norms No. 14 of 1 November 2007 amending and supplementing NBR Norms No. 4/1995 on the functioning of the interbank money market, BUBID and BUBOR become ROBID and ROBOR as follows: (i) ROBID: the interest rate on operations to raise funds and (ii) ROBOR: the interest rate on operations to invest funds.

13. Foreign exchange market indicators

13.1. Interbank foreign exchange market

The monthly volume of transactions in the interbank foreign exchange market represents the sum of the daily transactions, i.e. the daily highs between sales and purchases. The average annual volume of foreign exchange transactions is calculated as an arithmetic mean of monthly foreign exchange transactions.

The average monthly exchange rate (EUR/RON and USD/RON) is a simple arithmetic mean of daily exchange rates calculated and published by the National Bank of Romania every business day at 1:00 PM, based on the quotes of the banks licensed to perform foreign exchange transactions. The average annual exchange rate (EUR/RON and USD/RON) is calculated as a simple arithmetic mean of average monthly rates.

14. Capital market indicators

14.1. Bucharest Stock Exchange – Regulated market

The BET (Bucharest Exchange Trading) index is the BSE's first official index. It is calculated as a weighted average (with free float capitalisation) of the prices of stocks that make up the index basket. BET index has a variable number of constituents, with a minimum of 10 companies and a maximum of 15 companies.

Financial investment companies are not included in the basket of BET index. In order to prevent the developments in a small number of companies from having a significant impact on the index, the weight of any company in the index basket is limited to maximum 20 percent.

The BET-FI index is the first sector index developed by the BSE. It was originally calculated for the 5 financial investment companies listed and was envisaged to include all the financial investment

companies to be listed subsequently. Its calculation methodology is the same as that used for the BET index.

The BET-XT and BET-NG indices were launched on 1 July 2008, the methodology for their calculation being similar to that described above. The BET-XT index covers the developments in the 25 most liquid and most heavily traded companies on the regulated market, including financial investment companies, each accounting for no higher than 15 percent of the index basket.

The BET-NG index is a sector index reflecting developments in the share prices of the companies traded on the BSE regulated market whose core business is related to the energy sector and its related utilities. The maximum weight a company can hold in the index basket is 30 percent.

The BET Plus index, launched on 23 June 2014, reflects the evolution of Romanian companies listed on the BSE regulated market that meet the minimum selection criteria (in terms of liquidity and free-float value), except for financial investment companies. Similarly to the other indices developed by the BSE, the methodology of the BET Plus index takes into consideration the trades recorded on the main market segment ('Regular').

The ROTX (Romanian Traded Index) is a real time reflection of the movements of the blue chip stocks traded on the BSE. There is no fixed number of shares included in the ROTX index portfolio, as the key selection criteria are liquidity and market capitalisation. Calculated in lei, euro and US dollars and disseminated in real time by the Wiener Börse AG, the ROTX index is designed as a tradable index and can be used as an underlying asset for derivatives and structured products.

15. Romania's balance of payments and international investment position indicators

In 2024, the external sector statistics for the 2010-2023 period were updated in the context of the Harmonised European Revision Policy for Macroeconomic Statistics, which sets the standard rules and principles for the revision of EU Member States' statistical data. The general purpose of the benchmark revision is to incorporate new, improved information into the statistical data series or to ensure compliance with new international methodological standards or European regulations.

15.1. Balance of payments

The balance of payments summarises economic and financial transactions between residents and non-residents of Romania with the rest of the world during a specific time period. It consists of the goods and services account, the primary income account, transfers without a *quid pro quo* (donations, grants and the like), as well as financial claims and obligations. Its main items are the current account, the capital account, and the financial account.

a) The national legal framework: (i) Law No. 312/2004 on the Statute of the National Bank of Romania: the National Bank of Romania is legally empowered to compile the balance of payments (Article 9 para. (2)); (ii) Law No. 226/2009 on the organisation and functioning of official statistics in Romania: (Article 6 paras. (3)-(5)); (iii) NBR Regulation No. 4/2021 on reporting statistical data and information to the National Bank of Romania.

b) The international legal framework: (i) Regulation (EC) No. 184/2005 of the European Parliament and of the Council on Community statistics concerning balance of payments, international trade in services and foreign direct investment, as subsequently amended and supplemented; (ii) Guideline 2011/23 of the European Central Bank on the statistical reporting requirements of the European Central Bank in the field of external statistics, as subsequently amended and supplemented.

c) The international methodological standard on balance of payments compilation is ensured

by the IMF's sixth edition of the Balance of Payments and International Investment Position Manual (BPM6). In order to ensure consistence between international macroeconomic statistics, the BPM6 was prepared in line with the revised OECD Benchmark Definition of Foreign Direct Investment (2008 Benchmark Definition) and the System of National Accounts (2008 SNA).

d) Data sources: (i) quarterly sample-based or comprehensive direct statistical surveys on foreign direct investment; international trade in services; and financial information in relation to non-residents, other than that related to foreign direct investment; (ii) data collected on a monthly basis from credit institutions in virtue of NBR Regulation No. 4/2021 on reporting statistical data and information to the National Bank of Romania, related to transactions with non-residents on their own behalf and account; (iii) security-by-security data collection system for holdings and issues of securities; (iv) monetary statistics; (v) statistics on international trade in goods; (vi) administrative sources; (vii) monthly estimates referring mainly to balance-of-payments items for which data are available on a quarterly basis; (viii) data on liabilities in the form of long-term external private debt collected from residents in accordance with the provisions of Chapter II of Title II of NBR Regulation No. 4/2021; (ix) foreign direct investment data collected on a quarterly basis from credit institutions, insurance corporations and non-bank financial institutions in the General Register, in accordance with the provisions of Chapter III of Title II of NBR Regulation No. 4/2021.

e) Concepts and definitions

I. Current account. The current account reflects the provision or acquisition of real resources by the Romanian economy to or from the rest of the world, as well as unilateral transactions, without a *quid pro quo*.

The current account is subdivided into goods, services, primary income, secondary income.

On the credit side, transactions show the part of the reporting economy's domestic product supplied to other economies (exports of goods and services), income from using factors of production in foreign production process (compensation of employees and investment income) as well as the receipt of real or financial resources from abroad without a *quid pro quo*.

On the debit side, transactions show acquisition of goods and services from abroad (imports), income owed to non-residents for using their factors of production, real or financial resources granted to non-residents without a *quid pro quo*.

I.1. Goods – show international export/import transactions implying the change of ownership over the respective goods, unlike the export/import transactions reflected by the NIS statistics on international trade in goods that capture the circulation, i.e. dispatches/arrivals, of goods.

Trade in goods statistics exclude the value of goods that cross the border but do not change economic ownership (goods for processing, identified based on the type of transaction), but include the net value of processing services, which is recorded under "Manufacturing services on physical inputs owned by others".

I.1.1. General merchandise – shows exports and imports of goods that are subject to a change in economic ownership between residents and non-residents and cross the country border. Data are recorded at FOB values. Imports FOB are calculated by the NBR based on the CIF/FOB conversion factor set by the NIS.

I.1.2. Merchanting – is defined as the purchase of goods by a resident (of the compiling economy) from a non-resident combined with the subsequent resale of the same goods to another non-resident without the goods being present in the compiling economy. Acquisition of goods is recorded as negative exports of goods. Sale of goods is recorded as positive exports of goods. The difference between the selling price and the acquisition price is shown in “net exports of goods under merchanting”. Transactions are recorded at market values.

I.2. Services – are the result of a production activity that changes the conditions of the consuming units (individuals, legal entities or economic goods), or facilitates the exchange of products or financial assets.

I.2.1. Manufacturing services on physical inputs owned by others – cover processing, assembly, labelling, packing, and so forth undertaken by enterprises that do not own the goods concerned.

I.2.2. Maintenance and repair services – refer to maintenance and repair work by residents on goods that are owned by non-residents (and vice versa). Repairs and maintenance on ships, aircraft, and other transport equipment are included in this item. Construction maintenance and repairs as well as maintenance and repairs of computers are excluded.

I.2.3. Transport – is the process of carriage of people and objects from one location to another as well as related supporting and auxiliary services. It includes postal and courier services. Transport can be classified according to: mode of transport and object of transport (passengers, freight, other auxiliary services – uploading, downloading, storage etc.).

I.2.4. Travel credits cover the value in exchange for tourist services supplied to non-residents during visits to Romania and outside Romania and travel debits cover the value in exchange for tourist services provided to Romanian nationals outside Romania. The item includes business travel such as training courses, business meetings, conferences, events, etc. Another breakdown of travel shows: accommodation services, food-serving services, local transport services, cultural activities, recreational services, travel arrangements, goods and services acquired by persons during their stays abroad (e.g., souvenirs, provision of access to the Internet in hotels, etc.), health- and education-related services involving conveyance of customers (patients, students) from the home country to the host country.

I.2.5. Construction – refers to the total value of construction works carried out over less than one year. It records on a gross basis the creation, renovation, repair, or extension of buildings, land improvements of an engineering nature, and other such engineering constructions as roads, bridges, dams and so forth.

I.2.6. Insurance and pension services – include services of providing direct insurance, reinsurance, and auxiliary services, pension fund services. The value of these services is linked to the fees included in the premiums, not the premiums themselves.

I.2.7. Financial services – cover financial intermediary and auxiliary services, except insurance and pension fund services. They include both services charged for by explicit charges and financial intermediation service charges indirectly measured, abbreviated as FISIM.

I.2.8. Charges for the use of intellectual property – include charges for the use of proprietary rights that can arise from research and development as well as from marketing activities (patents, trademarks, copyrights, industrial processes and designs including trade secrets, franchises) as well as charges for licenses to reproduce or distribute (or both) intellectual property, and related rights.

I.2.9. Telecommunications, computer, and information services

Telecommunications services encompass the transmission of sound, images, data, or other information by telephone, telex, telegram, radio and television cable transmission, radio and television satellite, e-mail, facsimile, and so forth, including business network services, teleconferencing, and support services. Also included are mobile telecommunications services, Internet backbone services, and online access services, including provision of access to the Internet.

Computer services consist of hardware- and software-related services and data-processing services. Also included are hardware and software consultancy and implementation services; maintenance and repairs of computers and peripheral equipment; data recovery services, provision of advice and assistance on matters related to the management of computer resources; analysis, design, and programming of systems ready to use (including webpage development and design), and technical consultancy related to software; licenses to use non-customised (mass-produced) software; the development, production, supply, and documentation of customised software, including operating systems made to order for specific users; systems maintenance and other support services, such as training provided as part of consultancy; data-processing services, such as data entry, tabulation, and processing on a time-sharing basis; webpage hosting services (i.e., the provision of server space on the Internet to host clients' webpages); and computer facilities management.

Information services comprise news agency services as well as other information provision services: database services (database conception, data storage, and the dissemination of data and databases, including directories and mailing lists) both online and through magnetic, optical, or printed media; and web search portals. They also include direct non-bulk subscriptions to newspapers and periodicals, whether by mail, electronic transmission, or other means; other online content provision services; and library and archive services. Downloaded content that is not software (included in computer services) or audio and video (included in audio-visual and related services) is included in information services.

I.2.10. Other business services – cover research and development services, professional and management consulting services, technical, trade-related, and other business services.

I.3. Primary income – shows the return that accrues to institutional units for their contribution to the production process or for the provision of financial assets and renting natural resources, as reflected by the flows between resident and non-resident institutional units.

I.3.1. Compensation of employees – presents remuneration in return for the labour input to the production process contributed by an individual in an employer-employee relationship over a period less than one year.

I.3.2. Investment income – is derived from the provision/use of financial assets in a resident-non-resident relationship. It includes income on equity (dividends, reinvested earnings) and other financial assets (interest). In the balance of payments, investment income is classified according to the type of investment: direct investment income, portfolio investment income, other investment income and income on reserve assets. For the definitions of the types of investment, see the financial account.

I.3.3. Other primary income – classifies income by institutional sector of the reporting economy (general government or other sectors) and includes taxes on production and imports and subsidies on products and production. The non-refundable EU funds in

the form of subsidies from the European Agricultural Guarantee Fund and partly from the European Agricultural Fund for Rural Development are recorded under other primary income of the general government.

I.4. Secondary income – encompasses current transfers between residents and non-residents. A transfer is an entry that corresponds to the provision of a good, service, financial asset, or other non-produced asset by an institutional unit to another institutional unit when there is no corresponding return of an item of economic value. Current transfers consist of all transfers that are not capital transfers.

Current transfers are classified by the institutional sector providing or receiving the transfer: general government or other sectors. Current transfers of the general government comprise current taxes on income, wealth etc., social contributions, social benefits, current international cooperation, miscellaneous current transfers and the contribution to the EU budget (calculated based on value added tax and gross national income). They include non-refundable EU funds for current expenditure drawn from the European Social Fund, the Fund for European Aid to the Most Deprived, partly from the European Agricultural Fund for Rural Development, the European Maritime, Fisheries and Aquaculture Fund and the Recovery and Resilience Facility.

Current transfers of other sectors include current taxes on income, wealth etc., social contributions, social benefits, net non-life insurance premiums, non-life insurance claims, miscellaneous current transfers (personal transfers between resident and non-resident households, including workers' remittances).

II. Capital account covers acquisition and disposal of non-produced, non-financial assets and capital transfers between residents and non-residents.

II.1. Acquisition and disposal of non-produced, non-financial assets

Non-produced, non-financial assets consist of: natural resources, contracts, leases, and licenses and marketing assets (trademarks) and goodwill. This item records only acquisition and disposal of such assets, not their use.

II.2. Capital transfers consist in changes in ownership over fixed assets, transfers of funds connected to or conditional on the acquisition or disposal of a fixed asset and the cancellation of liabilities by the creditors without a quid pro quo. Capital transfers can be made in cash or in kind (such as debt forgiveness). The distinction between current transfers and capital transfers is, actually, the use of the transfer by the recipient country.

Capital transfers include: (i) taxes on capital; (ii) capital transfers for investment and (iii) other capital transfers and are classified according to the institutional sector initiating or receiving the transfer in the reporting economy: general government or other sectors. The capital transfers of the general government include non-refundable EU funds used for fixed capital formation and drawn from the European Regional Development Fund, the Cohesion Fund, partly from the European Agricultural Fund for Rural Development, the European Maritime, Fisheries and Aquaculture Fund and the Recovery and Resilience Facility.

III. Financial account

The financial account records net transactions that involve financial assets and liabilities and that take place between residents and non-residents. The net acquisition of financial assets is the difference between the acquisition of assets and the reduction in assets, while the net incurrence of liabilities is determined as the difference between the incurrence of liabilities and the reduction in liabilities.

Based on the functional category, the financial transactions are classified as: (i) direct investment; (ii) portfolio investment; (iii) financial derivatives; (iv) other investment and (v) reserve assets.

III.1. Direct investment

Direct investment implies a long-term investment relationship between a resident and a non-resident entity; it usually involves a significant degree of influence exerted by the investor on the management of the enterprise in which he has invested.

The direct investment components are: **equity**, namely the paid-up capital and the reserves related to a non-resident investor holding at least 10 percent of the subscribed share capital of a resident enterprise, the related **reinvested earnings**, as well as **debt instruments** (e.g., loans) between the investor or the group to which the investor belongs and the enterprise in which he has invested.

III.2. Portfolio investment is defined as cross-border transactions involving debt or equity securities, other than those included in direct investment or reserve assets. Portfolio investment includes securities such as **equity, investment fund shares** and **debt instruments**, except when they are classified either as direct investment or reserve assets.

III.3. Financial derivatives

A financial derivative contract is a financial instrument that is linked to another specific financial instrument or indicator or commodity and through which specific financial risks (such as interest rate risk, foreign exchange risk, equity and commodity price risks, credit risk, and so on) can be traded in their own right in financial markets. This category is identified separately from the other categories because it relates to risk transfer, rather than supply of funds or other resources. Unlike other functional categories, no primary income accrues on financial derivatives.

Due to the fact that in the case of financial derivative transactions the distinction between assets and liabilities is difficult, a convention was established at European level whereby all transactions with such instruments are recorded in the balance of payments as net acquisition of financial assets.

III.4. Other investment is a component that consists of transactions other than those included in direct investment, portfolio investment, financial derivatives and reserve assets.

III.4.1. Equity other than that related to direct investment and portfolio investment

reflects the participation in the capital of some international organisations, as well as the less than 10 percent participation in the share capital of quasi-corporations.

III.4.2. Currency and deposits include currency in circulation and deposits. Deposits are standard, non-negotiable contracts, generally offered by deposit-taking corporations, allowing the placement and the subsequent withdrawal of an amount of money by a creditor.

III.4.3. Loans include all loans, including housing loans, financial lease and repos.

All repurchase agreements are considered collateral loans, rather than simple sales/purchases of securities and are recorded under other investment.

III.4.4. Insurance, pension and standardized guarantee schemes include external assets and liabilities related to financial instruments, such as general insurance technical provisions, rights on life insurance and rents, pension rights, pension fund rights on the administrators of the pension funds, rights to benefits, other than pensions, as well as the provisions for the execution of the standardized guarantees;

III.4.5. Trade credit and advances are financial claims arising from credit extended directly by the suppliers of goods and services to their customers and advances for work that is in progress or is yet to be undertaken. Trade credit and advances arise when payment for goods or services is not made at the same time as the change in ownership of a good or provision of a service.

III.4.6. Other accounts receivable/payable include financial assets/liabilities, other than loans and trade credits and advances, which arise due to the time lag between the moment when a claim or an obligation to make a payment arises and the moment when it is settled. They include the amounts receivable/payable related to taxes, wages, dividends and social contributions that have been accrued, but not yet received/paid, as well as other accounts receivable/payable from the accrual-based recording of non-repayable EU funds.

III.4.7. SDR allocations – a component presenting a recipient's liability in relation to the IMF, with a corresponding entry under reserve assets.

III.5. Reserve assets are those external assets that are readily available to and controlled by monetary authorities for meeting balance of payments financing needs, for intervention in exchange markets to affect the currency exchange rate, and for other related purposes (such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing). Reserve assets must be foreign currency assets, claims on non-residents and assets that actually exist.

Residents

- natural entities – Romanian, foreign and stateless citizens residing in Romania, as attested by identity documents issued according to the law;
- legal entities and any other entities headquartered in Romania, as well as natural entities, Romanian, foreign and stateless citizens residing in Romania, which are authorised and/or registered to operate in Romania independently, according to the legal regulations in force;
- branches, agencies, representative offices, offices of foreign legal entities or other foreign entities, registered and/or authorised to operate in Romania; and;
- embassies, consulates and other permanent representative offices and missions of Romania abroad.

Non-residents

- natural entities – foreign, Romanian and stateless citizens residing abroad, as attested by identity documents issued according to the law;
- legal entities and any other entities headquartered abroad, as well as individuals, foreign, Romanian and stateless citizens residing abroad, which are authorised and/or registered to operate abroad, independently, according to the legal regulations in force;
- branches, agencies, representative offices, offices and any other undertakings of Romanian legal entities or other Romanian entities registered and/or licensed to operate abroad; and
- embassies, consulates and other permanent representative offices and missions of other countries in Romania, as well as international organisations or representative offices of such organisations operating in Romania.

15.2. International trade in services

The statistics on exports and imports of services are compiled according to the BPM6 methodology and are broken down by type of service according to the EBOPS classification (Extended Balance of Payments Services Classification).

15.3. Direct investment – directional principle

The difference between the asset-liability presentation (as shown in the standard balance-of-payments components) and the directional principle presentation is that the latter focuses on the investment relationship between the direct investor and the direct investment enterprise (claims of these enterprises on non-resident investors are recorded as decreases/withdrawals of direct investment).

Statistical data on direct investment recorded on a directional basis are compiled according to the BPM6 methodology.

15.4. Long-term external debt

Gross external debt is the outstanding amount of those actual current, and not contingent, liabilities that require future payments of principal and/or interest by the debtor and that are owed to non-residents by residents of an economy (according to the definition in External Debt Statistics: Guide for Compilers and Users). Statistics on gross external debt are compiled in compliance with the IMF and the EU methodology (*Balance of Payments Manual – BPM6; Manual on Government Deficit and Debt – Implementation of ESA 2010, 2014 Edition*).

External debt includes the following debt financial instruments: currency and deposits, loans, debt securities, trade credit and advances, liabilities from insurance, pension, and standardised guarantee schemes, SDR allocations and other liabilities (according to the IMF's *External Debt Statistics: Guide for Compilers and Users*, 2014).

External public debt is recognised, monitored and managed by the Ministry of Finance (Law No. 109/2008 approving Government Emergency Ordinance No. 64/2007 on public debt). Capital transactions in the form of long-term (LT) external private debt shall be notified to the NBR pursuant to NBR Regulation No. 4/2021 on reporting statistical data and information to the National Bank of Romania.

15.6. International investment position

Statistical data on Romania's international investment position are compiled based on IMF and EU methodology (*Balance of Payments Manual – BPM6*).

Romania's international investment position covers the country's stock of external assets and liabilities (between residents and non-residents) at a given time. Closing stocks are calculated based on the opening stocks and the information on financial flows (included in the balance-of-payments financial account) by taking into account exchange rate changes, international price changes, and other financial adjustments over the period under review.

The breakdown of international investment position reveals the main functional categories: direct investment, portfolio investment, financial derivatives, other investment and reserve assets. They comprise financial instruments such as equity, debt securities, financial derivatives, other equity, currency and deposits, loans, trade credits, pension and insurance schemes, other assets/liabilities, special drawing rights (SDRs), gold and other reserve assets. Financial instruments also contain information on their maturity.

Data on international investment position are compiled on a quarterly basis and revised in March/September each year for the previous reference period.
